TAKEMOTO

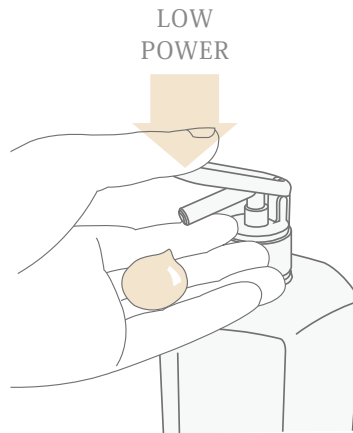

PD-0928LV Pump

Operates with the lightest pressure with the use of the lever principal

NEW

New pump with single-handed operation offers both style and convenience.

Lever-type dispensing pump with an innovative design that allows easy dispensing with a single hand. This new design provides both visual impact and convenient functionality.

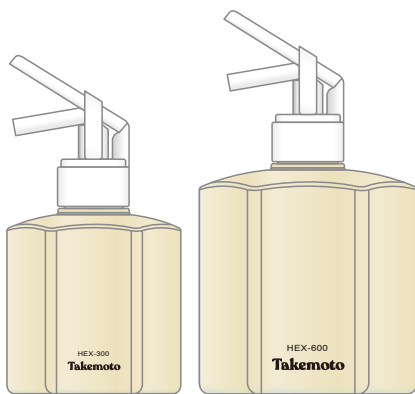

Thanks to the application of the lever principal, the pump operates reliably and smoothly even with the lightest pressure.

Range of multi-purpose bottles with low center of gravity to provide stability.

Lineup includes a bottle with an eye-catching off-centre neck to match the distinctive pump design.
